Claim Rejections - 35 USC § 103

Claims 1-4,6-21,23-60 and 62-75 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien in view of Shukat et al.

O'Brien discloses a panel that has rings, sleeves or tabs, all of which are readable on element 20 which is sewn at 64 onto the curtain and hence "non-releasable". The rod has not been positively recited and the sleeves/rings 20 are capable of being mounted on a rod. Also provided are spaced guide elements 26 which guide pull cords 60 or 88. The panel is made of cotton fabric, column 3, line 58. The synthetic fabric of claim 7 is not chosen, thereby obviating the limitation of claim 9, etc. The use of the panel, i.e. room divider, wall hanging, etc., is a functional recitation that does not limit the structure of the device. The size of the panel is obvious depending on the size of the opening it is intended to cover. What is not shown by O'Brien are the slats, or the equivalent thereto, dowels. However, such are well known in the art, as illustrated by Shukat at 52. It would have been obvious to modify O'Brien to have such slats so as to provide defined pleats. See Fig. 5 in Shukat et al which illustrates the accumulated configuration of the panel.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. It is noted that Applicant inaccurately indicates claims 1-75 as pending. Applicant is directed to the listing of pending claims on form 326 (page 1) of this action. Applicant argues that adding the bars of Shukat et al to O'Brien would take away the purpose of O'Brien's invention. However, to suggest that O'Brien has no other utility than to provide

Art Unit: 3634

a scalloped, etc., shade, and that O'Brien is destroyed is inaccurate. There are several features of O'Brien other than potential ballooning or scalloped shapes that render O'Brien desirable and of significant utility. Primarily, O'Brien is a raisable panel that can be mounted on conventional curtain rods. Modifying O'Brien to have slats does not limit this feature, or many other features, of O'Brien. Modifying a primary reference always changes its structure but may still constitute a valid modification.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
